About this workbook

Introduction

This workbook has been written for students who are planning to sit either the Academic or General Training modules of the IELTS examination. It covers some of the main vocabulary areas that you will need for, or come across in, the Listening, Reading, Writing and Speaking sections of the exam.

We hope that you find the exercises in this book useful, and that the vocabulary you acquire will help you to achieve the grade you want in the IELTS.

Good luck!

Structure of the book

Each vocabulary area is presented in the form of a self-contained module with task-based activities which present each vocabulary item in context.

- Pages 1 – 57 focus on general vocabulary items. Some of these are relevant to specific tasks or questions in the IELTS examination (for example, describing how something works, talking about changes shown in a graph or table, saying where things are and following directions).
- Pages 58 – 104 focus on topic-specific vocabulary areas which may be required in the examination (for example, education, architecture, family matters and science and technology). Each module consists of three tasks: the first two present vocabulary items in context, each with a practice or recognition exercise, and the third gives you the opportunity to review the vocabulary in a gap-fill exercise.
- Pages 105 – 119 contain some productive practice exercises which will give you the opportunity to practise using your vocabulary in some IELTS-style speaking and writing tasks. These tasks are followed by some sample answers. Note that these sample answers are there only to give you some guidance as to how the tasks might be answered. There are no ‘right’ or ‘wrong’ answers.

- Pages 120 – 139 contain a comprehensive key so you can check your answers. The answer key also gives additional information about specific vocabulary items or general vocabulary areas, as well as other useful words or phrases.

Using the workbook

You should not work through the book mechanically from beginning to end. It is better to choose areas that you are unfamiliar with, or areas that you feel are of specific interest or importance to yourself.

Recording, reviewing and extending your vocabulary

Remember that you should keep a record of new words, phrases and expressions that you acquire, and review these on a regular basis so that they become part of your active vocabulary. Also remember that there are other ways of acquiring new vocabulary. For example, you should read as much as possible from a variety of authentic reading materials (books, newspapers, magazines, web-based articles, etc.).

Using an English dictionary

To help you develop your vocabulary more effectively, you should use a good monolingual English dictionary. This should clearly explain what the words mean, show you how they are pronounced, show you their various forms where relevant (e.g., what the noun form of an adjective is), tell you which words or phrases they collocate with, and give sample sentences to show you how the words are used. We particularly recommend the *Macmillan English Dictionary for Advanced Learners* (ISBN 978-1405026284). A free on-line version of this can also be found at www.macmillandictionary.com.

The International English Language Testing System (IELTS)

The IELTS is administered by the University of Cambridge Local Examinations Syndicate (UCLES), the British Council and IDP Education Australia. For further information, visit www.ucles.org.uk. Note that this book is not endorsed by any of these organisations.

Context & meaning 1

When we see a new word (in a reading passage, for example), we can often work out what it means, or get an *idea* of what it means, by looking at the context in which it appears (for example, what is the *passage* about, what is the *sentence* about and what information comes before and after the word?).

Identifying the meaning of a word from its context is an especially useful skill in the IELTS Reading Test.

1 Look at these words, and answer the questions which follow.

nocturnal cites coherently feat

- Without seeing them in a sentence, do you know (or can you guess) what the words in the box mean?

nocturnal: Yes / No

cites: Yes / No

coherently: Yes / No

feat: Yes / No

- Now look at the words in the passage. Can you guess what they mean now? In your own words, explain what they might mean.

The remarkable success of Simon Weber's book on owls, bats, foxes and other **nocturnal** creatures, *A Call in the Dark*, is probably not surprising in view of the popularity of his recent television series, 'Night Prowlers'. It is a very thorough book by an author who is an expert in his field and who has clearly done a lot of research. In addition to describing his own findings, he **cites** the research carried out by others, including Wright and Lawson in the 1990s, and discusses where they might have gone wrong with some of their assumptions. He writes **coherently** on the subject, beginning by looking at basic facts before discussing progressively complex theories, without once confusing his readers. This is a remarkable **feat**, considering the complexity of the subject and the science that is often involved.

nocturnal:

cites:

coherently:

14. The city centre has some beautiful old buildings, but there are some extremely ugly industrial estates on the **fringe**.
15. Employees are encouraged to use their **initiative** when they are faced with a problem and there is nobody more senior there to help them.

3 Now match the words in bold in sentences 1 – 15 above with their definitions (a) – (o) below.

- (a) A serious or difficult responsibility that you have to deal with *burden*
- (b) Producing a lot of things, ideas, etc.
- (c) The ability to decide what to do in an independent way.

Context & meaning 3

Sometimes, in addition to its context, we can work out what a word means from 'clues' in the word itself. These clues are usually in the form of one or two words (or parts of words) that we already know, often with the addition of prefixes and / or suffixes.

For example:

Healthcare = health + care

The town lacks basic healthcare facilities, so people have to travel many miles to see a doctor.

Deforestation = de + forest + ation.

Deforestation has resulted in the destruction of thousands of acres of tropical forest.

Facial = face + ial (the e is removed)

The company started off producing a range of facial cleansers and moisturisers which had not been tested on animals.

Presenting an argument

Look at this typical IELTS Writing Test Part 2 question and the sample answer which follows it. Underline the most appropriate words and phrases in bold in the answer. In several cases, both options are possible.

Write about the following topic:

Some say that young people should take a break between school and university to go travelling and learn more about the world. Others say that it is better for them to go straight to university from school, and then go travelling when they have finished their studies.

Discuss both these views and give your own opinion.

Give reasons for your answer and include any relevant examples from your own knowledge and experience.

Write at least 250 words.

These days, it is very common for young people to take time off studying between school and university. Many of them go travelling, and spend a year or longer visiting interesting and exotic places. (1) **But / However**, is it better to do this, or to continue studying without a break?

(2) **First of all / Firstly**, there are several benefits to taking time off to travel.

(3) **As well as / In addition to** meeting lots of interesting people, you can also experience cultures that are very different from your own. (4) **I believe / I think** that first-hand knowledge and experience of the world around you early in life are useful things to have.

(5) **Moreover / Furthermore**, you learn to look after yourself in different and often difficult situations. (6) **Although / While** few people have serious problems when they travel, you will occasionally encounter situations where you need to think and act quickly without having friends or family to turn to. Unfortunately, travelling has its disadvantages (7) **also / as well**, such as homesickness and culture shock. (8) **Despite / Nevertheless**, these inconveniences are an inevitable part of travelling and are greatly outweighed by the advantages.

(9) **The most important reason / The main reason** for going straight to university after school is the fact that the sooner you get qualifications, the quicker you can get a job and start earning.

(10) **As far as I am concerned / For me**, starting work and making money is one of the most important things in life. I am not alone in this opinion. (11) **Many consider / Many say** a sound career and a good salary to be one of life's most important goals. (12) **Second / Secondly**, if you go straight to university, you learn so many things that will help you in your future life. (13) **Eventually / Finally**, going straight to university from school means that you maintain a momentum that you might lose if you go travelling. (14) **I mean / In other words**, you remain focused on studying.

(15) **In conclusion / To summarise**, I would say that spending a year travelling between school and university has its advantages and disadvantages. (16) **On the one hand / To begin**, you are seeing something of the world. (17) **After that / On the other hand**, you are delaying your education and career. (18) **In my opinion / I opinion that**, it is better to carry on with your studies, and leave the travelling until later.

It is becomming increasingly difficult for many people to find decent accomodation in the city at a price they can afford. To put it simply, there are too many people and not enough homes for them. Local community centres and charitable organisations such as *Home Front* can offer advice, but it is widely agreed that the situation is no longer manageable. The fact that some councils in the city are building cheap, temporary housing for lower-paid professionals is the only official acknowledgement of this problem.

Report from the director of the West Twyford Town Planning Committee

The last year has been a busy one for the West Twyford Town Planning Committee. Outlined below are a few of the areas we have concentrated on.

1. Applications for 1..... permission from home owners who want to develop their properties have increased by 50 per cent. However, many of these homes are historic buildings and have 2..... orders which prevent them from being altered externally. At present, we can only allow owners to 3..... the inside of their homes (including installing central heating and improved wall insulation).
2. Last summer we invited several 4..... to design plans for the new council offices on Peach Street. We eventually chose Barnard, Jackson and Willis, a local company. It was generally agreed that their design, which included a grey tinted 5..... 6..... at the front of the building, was the most aesthetically pleasing. They are currently in the process of laying the 7..... for the new building, which we understand is taking some time as the land must be drained first.
3. In response to a lot of complaints about the lack of 8..... facilities in the town, it was agreed at last month's meeting that funds should be set aside for the construction of a new sports centre and youth club.

4. Several 9..... buildings which have been ruined and abandoned for over five years are to be knocked down. In their place, a new housing 10..... will be built. This will provide 20 new homes within the next two years.
5. Everybody agrees that the new shops on the High Street are 11..... It is certainly true that they are very ugly and out of keeping with the other buildings on the street. In future, we must ensure that all new buildings are built in a 12..... style so that they fit in with the older buildings around them.
6. There has been an increased crime rate in the 13..... to the east of the town. We plan to demolish these run-down areas within the next eight years and re-house the residents in new 14..... apartments in the Berkely Heath district.
7. In an attempt to help the environment, we are going to make the town hall more 15..... Windows will be double-glazed, walls and ceilings will be insulated and we will replace the current central heating system.

My next report will be in two months' time. Anybody wishing to discuss these issues can contact me on extension 287.

3 Complete this case study with one of the words or phrases from Exercises 1 and 2. You will need to change one of the word forms.

Bob's problems began during his 1..... years. His parents got 2..... when he was young, and neither of them wanted to raise him or his brother and sister, so he was 3..... by a 4..... chosen by

his parents' social worker. Unfortunately, his foster father was a strict
 5..... and often beat him. Bob rebelled against this strict
 6....., and by the time he was eight, he was already
 7....., stealing from shops and playing truant. By the
 time he reached 8....., sometime around his 13th
 birthday, he had already appeared in court several times, charged with
 9..... crime. The judge blamed his foster parents,
 explaining that children needed 10..... parents and guardians
 who would look after them properly. The foster father objected to this, pointing
 out that Bob's 11..... – his two brothers and sister –
 were 12..... children who behaved at home and
 worked well at school.

This has raised some interesting questions about the modern family system.
 While it is true that parents should not be too 13.....
 with children by letting them do what they want when they want, or be too
 14..... by sheltering them from the realities of life,
 it is also true that they should not be too strict. It has also highlighted the
 disadvantages of the modern 15..... family where
 the child has only its mother and father to rely on (or the
 16..... family, in which the mother or father has to
 struggle particularly hard to support their 17.....).
 In fact, many believe that we should return to traditional family values and the
 18..... family: extensive research has shown that
 children from these families are generally better behaved and have a better
 chance of success in later life.

3. Now look at this extract from a politician's speech and complete the gaps with one of the words or phrases from Exercises 1 and 2. In some cases, more than one answer may be possible.

Are you worried about crime? I am. We read it every day in the papers. A terrible crime has been 1....., the police have 2..... someone, he has appeared in front of a jury in a 3..... of law, he has 4..... his innocence but has been found 5..... of his crime and he has been 6..... to 10 years in prison. We are all very relieved that the criminal is being punished for his 7....., and 8..... citizens like you and me can sleep more safely at night.

But what happens next? We all hope, don't we, that the prisoner will benefit from society's 9....., that a spell in prison will 10..... him and make him a better person. We all hope that he will 11..... and become like us. We all hope that when he is eventually 12..... and let loose on the streets, he will be a good character, the threat of another spell in jail being a suitable 13..... which will stop him from

breaking the law again. Oh yes.

But let's face it. The reality is usually very different. The prisoner may be released on 14....., before the end of his sentence. He will try to re-enter society. But then he often becomes a 15..... himself, unable to find work and rejected by society. It isn't long before he's back in prison again.

So what alternatives are there, I hear you say. What can we do to the 16..... to make sure he doesn't commit another crime? There are alternatives to prison, of course, such as 17..... in which he will provide a service to those around him. Or he can pay a large 18..... Alternatively, we could establish a more severe system of punishment, including 19..... and 20....., but we like to consider ourselves civilised, and the idea of beating or executing someone is repellent to us. Oh yes.

The answer, of course, is far simpler. We need to be tough not on the criminal, but on the cause of the crime. We should spend less of the taxpayer's money funding the 21..... and 22..... and all the other people who work for the legal system, and put the money instead into supporting deprived areas which are the breeding grounds for crime. We in the ConLab Party believe that everybody needs a good chance in life, and this is a good step forward. Vote for us now!

3 Now read this essay and complete the gaps with one of the words or phrases from Exercises 1 and 2. You will need to change the form of some of the words.

'You are never too old to learn'. Do you agree with this statement?

Education is a long process that not only provides us with basic

(1)..... such as

(2)..... and (3).....,

but is also essential in shaping our future lives. From the moment we enter

(4)..... as small children, and as we progress

through (5)..... and (6).....

education, we are laying the foundations for the life ahead of us. We must

(7)..... ourselves to work hard so that we can

(8)..... exams and gain the

(9)..... we will need to secure a good

job. We must also (10)..... valuable life skills so

that we can fit in and work with those around us. And of course

(11)..... education helps us to understand how we can stay fit and healthy.

For most people, this process ends when they are in their mid-to-late teens.

For others, however, it is the beginning of a lifetime of learning. After they

finish school, many progress to (12)..... education

where they will learn more useful skills such as computer literacy or basic

business management. Others will (13)..... on a

programme of (14)..... education at a university

where, with hard work, they will have the opportunity to

(15)..... after three or four years with a well-

earned (16)..... After that, they may work for a

while before opting to study for a (17)..... degree

– an MA, for example, or a PhD. Alternatively, they may choose to attend an

(18)..... after work or, if they have a sympathetic

employer, obtain (19)..... so that they can study

during the week. And if they live a long way from a college or university, they

might follow an (20)..... course using the Internet.

In fact, it is largely due to the proliferation of computers that many people who

have not been near a school for many years, have started to study again and can

proudly class themselves as (21)..... students.

We live in a fascinating and constantly changing world, and we must

continually learn and acquire new knowledge if we are to adapt and keep up

with changing events. Our schooldays are just the beginning of this process,

and we should make the best of every (22) to
develop ourselves, whether we are 18 or 80. You are, indeed, never too old to
learn.

'Environmental degradation is a major world problem. What causes this problem, and what can we do to prevent it?'

There is no doubt that the environment is in trouble. Factories burn 1..... which produce 2....., and this kills trees. At the same time, 3..... gases rise into the air and contribute to 4....., which threatens to melt the polar ice cap. Meanwhile farmers clear huge areas of 5..... in places such as the Amazon to produce feeding land for cattle or wood for building. Rivers and oceans are so heavily 6..... by industrial waste that it is no longer safe to go swimming. Cars pump out poisonous 7..... which we all have to breathe in. 8..... and overfishing are

killing off millions of animals, including whales, elephants and other
 9..... In fact, all around us, all living things large
 and small which comprise our finely balanced
 10..... are being systematically destroyed by
 human greed and thoughtlessness.

There is a lot we can all do, however, to help prevent this. The easiest thing, of
 course, is to 11..... waste material such as paper
 and glass so that we can use it again. We should also check that the things we
 buy from supermarkets are packaged in 12.....
 packaging which decomposes easily. At the same time, we should make a
 conscious effort to avoid foods which are 13.....
 (at least until someone proves that they are safe both for us and for the
 environment). If you are truly committed to protecting the environment, of
 course, you should only buy 14..... fruit and
 vegetables, safe in the knowledge that they have been naturally cultivated.
 Finally, of course, we should buy a smaller car, as these cause less
 15..... than large saloons or SUVs. Even better,
 we should try to make more use of public transport.

The serious 16..... , however, do much more.
 They are aware of the global issues involved and will actively involve
 themselves in 17..... by making sure our forests
 are kept safe for future generations. They will oppose activities which are
 harmful to animals, such as 18..... . And they will
 campaign to keep the 19..... around our towns and
 cities free from new building.

We cannot all be as committed as them, but we can at least do our own little bit
 at grass roots level. We, as humans, have inherited the earth, but that doesn't
 mean we can do whatever we like with it.

3 Complete this article with the words and phrases from Exercises 1 and 2. In some cases, more than one answer is possible.

Children love eating (1), but burgers, chicken nuggets and other heavily (2) food products not only contain a large number of unhealthy chemicals and other additives, but also lack the essential (3)..... and (4) that a child needs. In addition, they also contain a lot of (5) and (6) which, if eaten in quantity, can result in childhood (7)..... (in fact, a recent survey suggests that 39 per cent of 8 – 15 year-olds are seriously overweight).

Many children end up (8)....., since they eat too much of the wrong sort of food. In fact, in many parts of the developed world, a lot of children show similar symptoms to those in poorer developing countries, where food (9)..... cause thousands of deaths from starvation, especially in the wake of natural disasters which ruin crops and in some cases totally destroy the annual (10)..... Furthermore, the large amounts of (11)..... in animal and dairy products (a common feature of fast food) are believed to be partly responsible for increased cases of heart disease in young people, a recent phenomenon that is causing great concern.

It is therefore important children learn the benefits of eating a (12)....., as it is important they consume sufficient quantities of the different food groups. They should be encouraged to eat more (13)..... fruit and vegetables, and also more food that is high in (14)..... They should still be allowed the occasional burger or pizza, but these should be seen as an occasional treat rather than forming the main part of their diet.

3 Complete this report of a journey with words and phrases from Exercises 1 and 2. In some cases, more than one answer is possible.

We began our journey in the capital, Trinifuegos, a
1..... conurbation of almost 10 million. It is not a
pretty place; heavily 2....., with huge factories
belching out black fumes, and miles of 3..... as
housing estates and shopping centres spread out from the
4..... centre for miles. It was a relief to leave.

As soon as we got into the countryside, things improved considerably. The
climate is dry and it is difficult to grow anything, but thanks to
5....., which helps bring water in from the Rio
Cauto (the huge river with its 6..... high up in the
snow-covered 7..... of the Sierra Maestra
8.....), the land is fertile enough to grow the sugar
cane on which much of the economy is based. We saw few people, however, as
many have moved to the towns and cities to look for more profitable work. It is
largely due to this rural 9..... that the sugar-cane
industry is suffering.

Further south and we entered the Holguin 10.....,
with mountains rising high above us on both sides. The land here drops sharply
to the sea and the slow-moving waters of the Rio Cauto give way to

11..... which tumble over cliffs, and small, fast-moving 12..... which are not even wide enough to take a boat. At this point, the road we were travelling along became a 13..... which was only just wide enough for our vehicle, and then an unpaved 14..... which almost shook the vehicle to pieces.

And then suddenly, the Pacific 15..... was in front of us. Our destination was the town of Santiago de Gibara, built on a 16..... sticking out into the blue waters. The countryside here undulates gently, with low 17..... covered in rich tropical jungle. The open 18..... surrounding the 19..... of the Rio Cauto as it reaches the ocean is rich and 20....., ideal for growing the tobacco plants which need a lot of warm, damp soil.

That night I lay in my cheap hotel, listening to the waves gently lapping the 21....., and when I eventually fell asleep, I dreamt of the people who had first inhabited this 22..... almost 2,000 years before.

12. British people enjoy free healthcare thanks to the **large amount of money which is spent to make sure they have adequate health services**.

3 Now look at this extract from a magazine article and complete the gaps with one of the words or phrases from Exercises 1 and 2. In some cases, more than one answer may be possible.

A cure for the future in the past?

For over 50 years, the people of Britain have relied on the

1..... to make sure they have adequate health services. But now the National Health Service is sick. Government 2..... and 3..... are forcing hospitals to close, and waiting lists for treatment are getting longer. Under such circumstances, it is no surprise that more people are turning to private (but expensive) healthcare.

For some, however, there are alternatives. They are turning their backs on modern pills, tablets and other 4..... It seems paradoxical, but in an age of microchips and high technology, 5..... (the old-fashioned cures that our grandparents relied on) is making a comeback.

Consider these case studies:

Maude is 76 and has been suffering from 6..... for almost 10 years. “The inflammation in my joints was almost unbearable, and my doctor referred me to a 7..... at the London Hospital. I was told that I needed 8....., but would need to wait for at least two years before I could have the operation. In desperation, I started having massage sessions. To my surprise, these were very 9....., and while they didn’t cure the disorder, they did relieve it to some extent.”

Ron is 46. His high-powered city job was responsible for a series of 10..... illnesses, and the drugs he took did little to relieve the nervous strain. “I read about treatments which involve the whole person rather than the individual 11....., but I had always been sceptical about 12..... However, my friend recommended a dietician who advised me that part of my problem was 13.....-related. Basically, the foods I was eating were contributing to my disorder. She gave me a list of foods that would provide the right 14..... and 15..... to keep me in good health. At the same time, she recommended a more 16..... lifestyle – running, swimming, that kind of thing. I’m a bit of a couch potato, and the 17..... lifestyle I had lived was compounding the problem. Now I feel great!”

So is there still a place in our lives for modern medicine? While it is true that some infections and viruses may be prevented by resorting to alternative medicine, more serious illnesses such as 18..... need more drastic measures. We do need our health service at these times, and we shouldn’t stop investing in its future. But we mustn’t forget that for some common illnesses, the cure may lie in the past.

Interviewer: Welcome to today's programme. Today we will be discussing the
 1....., and asking the question: Should we allow newspapers and
 television channels to print or say whatever they like? In the studio I have television
 personality Timothy Blake and 2..... Rupert Poubelle, multi-millionaire
 owner of the *Daily Views* newspaper. Timothy, let's start with you.

T.B.: Thank you. In my opinion, it's time the government imposed stricter
 3..... of the press in order to prevent
 4..... journalists and reporters from making money by
 5..... people. I have often accused Mr Poubelle's
 organisation of 6..... – nowadays I can't even sunbathe in my garden
 without being photographed by his hordes of 7.....
 They're like vultures. And everything they print about me is lies, complete rubbish.

Interviewer: But isn't it true that the media provides us with valuable 8..... and
 9....., and censorship would deprive us of much of this?
 Rupert?

The media

- R.P.:** Of course, Mr, Blake's accusations are unfounded, as are the accusations of
 10..... we have received. However, I can safely say that the *Daily Views*
 never pays people huge amounts of money for stories. We have far too much
 11..... for that. And don't forget that my paper also has an excellent
 reputation for 12..... Remember it was us who uncovered
 corruption in the banking system, and ran a series of articles on child labour in clothing factories.
 We give our 13..... what they want, and that's what really counts.
- T.B.:** But most of what you report isn't really news. And a lot of it is just a big pile of lies. Sensational
 stories made up to entertain people. Typical 14..... behaviour, in other words.
 I'm amazed nobody has sued you for 15..... yet.

3 Now read this essay and complete the gaps with one of the words or phrases from Exercises 1 and 2. You will need to change the form of some of the words.

'The media plays a valuable role in keeping us informed and entertained. However, many people believe it has too much power and freedom.' Discuss your views on this, giving examples and presenting a balanced argument both in favour of, and against, the power and freedom of the media.

Barely a hundred years ago, if we wanted to stay informed about what was going on in the world, we had to rely on word of mouth or, at best, newspapers. But because communication technology was very basic, the news we received was often days or weeks old.

We still have newspapers, of course, but they have changed almost beyond recognition. Whether we choose to read the 1....., with their quality 2..... of news and other 3..... by top 4..... and articles by acclaimed 5....., or we prefer the popular 6....., with their lively gossip and colourful stories, we are exposed to a wealth of information barely conceivable at the beginning of the last century.

We also have television and radio. News 7..... let us know about world events practically as they happen, while sitcoms, chat shows and documentaries, etc. keep us entertained and informed. And there is

also 8....., where we can access information from millions of 9..... around the world which we can then 10..... on to our own computers.

However, these forms of 11..... and 12..... (or 'infotainment' as they are sometimes collectively called) have their negative side. Famous personalities frequently accuse the 13..... (and sometimes even respectable papers) of 14..... by gangs of 15..... who follow them around with their cameras and long lenses. Newspapers are often accused of 16..... by angry politicians who hate reading damaging lies about themselves, and there are frequent accusations of 17....., with 18..... reporters paying people vast sums of money to tell them about the crime they committed or what their famous neighbour has been up to. Of course, it's not just the papers which are to blame. Television companies have cast their 19..... aside to get a good story, and you cannot even 20..... to the Internet without seeing something shocking or unacceptable. 21..... argue that they are just giving people what they want, but in my opinion, people should not always *get* what they want.

Many argue that the government should impose stricter 22..... to prevent such things happening. But others argue that 23..... is the keystone of a free country. Personally, I take the view that while the media may occasionally abuse its position of power, the benefits greatly outweigh the disadvantages. Our lives would be much emptier without the wealth of information available to us today, and we are better people as a result.

Chris: No, but I do believe that in a modern household, there should be a clearly defined 6..... Men are good at DIY, for example. Most women aren't. And I'll always believe that it's the man who should be the 7....., providing food and shelter for his family.

Sam: Well, all I can say is that I'm glad your ideas of 8..... are not shared by most people.

Chris: Nonsense! A lot of people believe in traditional 9.....: the man goes out to work, the woman stays at home. It's as simple as that.

Sam: Men at work and women at home? Come on, love, those are such typical 10..... With people like you around, the 11..... will continue to rage on and on.

Chris: Oh give it a rest, Dad. I'm right, and you know I am.

Sam: Sorry, Christine, but we're in the twenty-first century now. You need to move with the times.

3 Complete this essay with words and phrases from Exercises 1 and 2. In some cases, more than one answer is possible.

A totally 1..... society, in which sexual 2..... between men and women is the norm, is still a long way off. This is certainly the case if you watch certain television programmes, where men are often portrayed as the 3....., bringing money home to the wife, who is often depicted as the 4....., prone to extreme emotions and temper tantrums. But is this really the case? Is it still fair to create 5..... such as this? After all, as more women go out to work, and more men stay at

home to look after the house and children, it is becoming clear that so-called
6..... are merging and disappearing.

Men & women

Take the office workplace as an example. For years, businesses and companies were 7..... The directors, managers and other senior executives were always male, the secretaries and personal assistants almost always female. This was probably because men were traditionally seen as more 8....., more able to deal with the cut-and-thrust of business. However, now women are proving that they can be just as tough, if not tougher, while simultaneously being more 9..... and caring. In fact, in many ways, women are much better at 10....., which is vital in modern business where you are expected to do more than one job. And thanks to the 11....., women are paid the same as men. It would appear that, in many cases, the 12..... is a dying breed (although, unfortunately, there are still many 13..... men in the workplace who think they can do everything and anything better than their female colleagues, and there are still cases where women climbing up through the ranks get to a point where they hit a 14..... and cannot climb any higher).

At home, too, there is less evidence of 15..... It is no longer the woman who does all the cooking, cleaning and 16..... Such 17..... is now often shared equally. 18..... no longer expects the woman to stay indoors all day while the man stays out until all hours.

The good news, therefore, is that women no longer need to feel they are regarded as mere 19....., or the underdogs in a 20..... with their 21..... In fact, many believe that in the 22....., it is women who have come out on top.

Financial advice from a father to a son.

In the play *Hamlet* by William Shakespeare, a father gives his son some financial advice. 'Neither a borrower nor a lender be', he says. He is trying to tell his son that he should never 1..... money from anyone because it will make it difficult for him to manage his finances. Likewise he should never give a financial 2..... to a friend because he will probably never see the money again, and will probably lose his friend as well.

Money & finance

The play was written over 400 years ago, but today many parents would give similar advice to their children. Imagine the conversation they would have now:

Son: Right, Dad, I'm off to university now.

Father: All right, son, but let me give you some sound financial advice before you go.

Son: Oh come on, Dad.....

Father: Now listen, this is important. The first thing you should do is to make sure you balance your
3..... – the money you receive from me – and your
4..... – the money you spend. If you spend too much, you will end up
with an 5..... at the bank. Don't expect me to pay it for you.

Son: But it's so difficult. Things are so expensive, and the 6..... goes up
all the time. 7..... is running at about 10 per cent.

Father: I know, but you should try to 8..... Avoid expensive shops and
restaurants. Also, put your money in a good 9..... They offer a
much higher rate of 10..... than banks. Also, avoid buying things
11.....

Son: Why?

Father: Because shops charge you an 12..... amount of money to buy things
over a period of time. It's much better to 13..... a little bit of money
each week so that when you see something you want, you can buy it outright. Try to wait for
the sales, when shops offer huge 14..... and you can pick up a
15..... And try to get a 16.....

Son: How do I do that?

Father: Easy. When you buy something, ask the shop if they'll lower the price by, say, 10 per cent.
Next, when you eventually get a job and are earning a good salary, try to
17..... the money in a good company. Buy 18..... in
government organisations or 19..... in private companies.

Son: OK, Dad, I've heard enough.

Father: One final piece of advice, son.

Son: What's that, Dad?

Father: To thine own self be true.

Son: You what?

3 Now look at this essay and fill in the gaps with one of the words or phrases from Exercises 1 and 2. In some cases, more than one answer will be possible. You may need to change some of the word forms.

‘Technology has come a long way in the last 50 years, and our lives have become better as a result. Or have they?’

The last 50 years have seen more changes than in the previous 200. There have been many remarkable advances in medicine and medical technology that have helped to increase our average 1..... way beyond that of our ancestors. Incredible

2..... such as satellite television have changed the way we spend our leisure hours. Perhaps the most important 3....., however, has been the microchip. Nobody could have imagined, when it was first 4....., that within a matter of years, this tiny piece of silicon and circuitry would be found in almost every household object from the kettle to the video recorder. And nobody could have predicted the sudden proliferation of computers that would completely change our lives, allowing us to access information from the other side of the world via the 5..... or send messages around the world by 6..... at the touch of a button. Meanwhile, 7..... into other aspects of information technology is making it easier and cheaper for us to talk to friends and relations around the world. Good news for 8..... who love modern technology, bad news for the 9..... who would prefer to hide from these modern miracles.

But everything has a price. The development of 10..... led to mass automation in factories, which in turn led to millions losing their jobs. The genius of Einstein led indirectly to the threat of nuclear war and the dangerous uncertainties of 11..... (we hear of accidents and mishaps at nuclear power

stations around the world, where 12..... to prevent accidents were inadequate). The relatively new science of 13..... has been seen as a major step forward, but putting modified foods on to the market before scientists had properly 14..... them was perhaps one of the most irresponsible decisions of the 1990s. Meanwhile, pharmaceutical companies continue to 15..... on animals, a move that many consider to be cruel and unnecessary.

Of course we all rely on modern science and technology to improve our lives. However, we need to make sure that we can control it before it controls us.

For seven years I lived in Singapore, a 1..... of almost three million people. Like London, Paris and New York, Singapore is a 2..... city, with people from different parts of the world living and working together. I enjoyed the 3..... lifestyle I led there, and made the most of the superb 4....., ranging from the excellent shops to some of the best restaurants in the world. In the evenings and at weekends there were always 5.....; with such diverse attractions as classical western music, an exhibition of Malay art or a Chinese opera in the street, it was difficult to get bored. Perhaps most impressive, however, was the remarkable transport 6....., with excellent roads, a swift and efficient bus service and a state-of-the-art underground system which could whisk 7..... from the suburbs straight into the heart of the city (this was particularly important, as the government banned private cars from entering the 8..... during the morning and afternoon 9..... in order to reduce 10..... on the roads and 11..... from the exhausts).

Of course, living in a city like this has its disadvantages as well. For a start, the 12..... can be very high – renting an apartment, for example, is very expensive. And as the city is expanding, there are a lot of 13..... where new apartments are continually being built to deal with the 14..... which is a direct result of the government encouraging people to have more children.

Fortunately, Singapore doesn't suffer from problems that are common in many cities such as 15....., which is partly the result of the government imposing very severe penalties on anyone bringing narcotics into the country, so it is safe to walk the streets at night. In fact, the 16..... housing estates there are probably the safest and most orderly in the world.

Singapore wouldn't be ideal for everyone, however, especially if you come from the countryside and are used to a 17..... lifestyle. The traditional villages that were once common have disappeared as the residents there realised there were no 18..... for their future and moved into new government housing in the city. Nowadays, there is very little 19..... around the city, which means that Singapore imports almost all of its food. And despite a 'green' approach to city planning, the 20..... which has eaten into the countryside has had a

detrimental effect on the 21.....

'Travel: the other side of the coin'

Most of us have, at some point in our lives, experienced the joys of travel. We go to a 1..... to pick up some brochures, or look on the Internet for a cheap holiday deal. We book a two-week 2..... with flights and accommodation included (or if we are 3....., we make our own way to the country and travel around from place to place with a rucksack on our back). We make sure we have all the right currency, our passport and any 4..... that are necessary to get us into the country. We go to the airport and 5..... We strap ourselves into our tiny 6..... aircraft seats and a few hours later we 7..... from the aircraft, strange new sights, smells and sounds greeting us. Nowadays, it seems, the whole world goes on holiday at once: the age of 8..... is in full swing!

But for the great majority of people around the world, travel for them is done in the face of great adversity and hardship. They never get to indulge in an 9..... holiday in a luxury hotel with all meals and drinks included. They never get to explore the lush Amazon Rain Forest or the frozen wastes of the Arctic on an 10..... holiday. For them, travel is a matter of life and death. I refer, of course, to all the 11..... escaping from their own countries, or the 12....., moved from one part of their country to another by an uncaring government, or 13..... forced to find a job and seek a living wherever they can.

Can you imagine anything worse than the misery these people must face? Let's not confuse them with those 14..... who choose to live in another country and often have nice houses and high salaries. These people are simply desperate to survive. As well as losing their homes because of war or famine or other natural disasters, they must come to terms with their new environment: for many, the 15..... can be too great. And while many countries with an open policy on 16..... will welcome them in with open arms, others will simply turn them away. These people become 17....., unwanted and unwelcome. Even if they manage to get into a country, they will often be 18..... or repatriated. Their future is uncertain.

Something to think about, perhaps, the next time you are 19..... to your five-star hotel by a palm-fringed beach or sitting in a coach on an 20..... to a pretty castle in the countryside.

2 Match sentences 1 – 6 in box A with one of the sentences A – F in box B. Write the person's name after each sentence A – F. Use the words and phrases in bold to help you.

Box A.

1. Samantha is the assistant manager of a bank and she works from 8.30 to 5.30 every day.
2. Tracy works on the production line of a factory which makes cars. She uses a machine to spray paint on to the finished car parts.
3. Jane works for herself. She is a photographer. She works every day for about eight or nine hours.
4. Jeanette is a cleaner for a company in Birmingham, but she only works there for about three or four hours a day.
5. Claire has a powerful job in the personnel office of a large multinational company. She is responsible for employing new people and getting rid of those that the company doesn't want to employ any more.
6. Marie works in the finance department of an international college in Oxford.

Box B.

- A. She is a ***semi-skilled blue-collar worker*** in a ***manufacturing industry***.
- B. She is ***self-employed full-time***. She likes to describe herself as ***freelance***.

- C. She is responsible for *hiring and firing*.
- D. She calculates the *wages, salaries, pension contributions* and *medical insurance contributions* of all the staff.
- E. She is a *full-time white-collar workerservice industry*.
.....
- F. She is an *unskilled part-time employee*.

‘Some people live to work, and others work to live. In most cases, this depends on the job they have and the conditions under which they are employed. In your opinion, what are the elements that make a job worthwhile?’

In answering this question, I would like to look first at the elements that combine to make a job undesirable. By avoiding such factors, potential 1..... are more likely to find a job that is more worthwhile, and by doing so, hope to achieve happiness in their work.

First of all, it doesn't matter if you are an 2..... worker cleaning the floor, a 3..... 4..... worker on a production line in one of the 5....., or a 6..... worker in a bank, shop or one of the other 7.....: if you lack 8....., with the knowledge that you might lose your job at any time, you will never feel happy. Everybody would like a 9..... in which he or she is guaranteed work. Nowadays, however, companies have a high turnover of staff, 10..... new staff and 11..... others on a weekly basis. Such companies are not popular with their workers.

The same can be said of a job in which you are put under a lot of 12..... and worry, a job which is so 13..... that it takes over your life, a job where you work 14..... and so never get to see your family or friends, or a physical job in which you do the same thing every day and end up with the industrial disease that is always in the papers nowadays –

15.....

With all these negative factors, it would be difficult to believe that there are any elements that make a job worthwhile. Money is, of course, the prime motivator, and everybody wants a good

16..... But of course that is not all. The chance of 17....., of being given a better position in a company, is a motivating factor. Likewise,

18..... such as a free lunch or a company car, an

19..... scheme to make you work hard such as a regular 20..... above the rate of inflation,

21..... in case you fall ill and a company

22..... scheme so that you have some money when you retire all combine to make a job worthwhile.

Unfortunately, it is not always easy to find all of these. There is, however, an alternative. Forget the office and the factory floor, become

Architecture

In addition to the words and phrases which appear in the General Vocabulary section of this book, you may also find some useful words and phrases on pages 58 and 59.

You will find some sample answers on the following two pages, but try to do the tasks first.

SPEAKING

PART 1

Answer these questions. Try to speak for about 4 or 5 minutes in total.

- What sort of building do you live in?
- What do you like or dislike about it?
- Are there any ways in which you would improve the building you live in?
- If you were to move, what sort of building would you like to move to?

PART 2

Look at this task and spend one minute thinking about what you are going to say (you can make notes if you like). Then talk about the topic for between one and two minutes.

Describe a building that you know well.

You should say:

where the building is

what it is used for

what the building looks like on the outside

and explain what you like or dislike about this building.

PART 3

Answer these questions. Try to speak for about 4 or 5 minutes in total.

- Are there any architectural styles which are particularly common in your home town or city?
- What changes in architectural style have taken place in your country in the last 20 or 30 years?
- Why do you think that some people prefer modern buildings to more traditional ones?

WRITING

You should spend about 40 minutes on this task.

Write about the following topic:

Some people say that older, more traditional buildings in cities should be preserved. Others believe that these buildings should be demolished and new ones built in their place.

Discuss both these views and give your opinion.

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

Write at least 250 words.

Practice tasks 1: Sample answers

SPEAKING

PART 1

- What sort of building do you live in?

I live in an apartment in a tower block on a modern estate. It's very small, with just two bedrooms, a living room, a bathroom and a tiny kitchen. It's quite simply furnished, but it's very comfortable and I've made it look nice with pictures and other things that I've picked up in second-hand shops. The best thing about it is the view. We're on the 15th floor, so we can see the whole city from our living room.

- What do you like or dislike about it?

Well, like I said, it is rather small, and I would really like more space. It can be a bit claustrophobic at times, especially when I have friends over. Another problem is that the walls are thin, so you often hear your neighbours, you know, when they have their television on or when they're having an argument. And there's no outdoor space, like a balcony or a garden. Perhaps the thing I dislike the most about it is that the building itself is an eyesore, all concrete. However, because we live in it, we don't have to look at it!

- Are there any ways in which you would improve the building you live in?
I would certainly do something to the walls so that I don't have to listen to my neighbours all the time. I know that you can get special material you put between the walls to reduce noise, but it's very expensive to get this done. I would also like a balcony or perhaps a roof garden, somewhere to sit outside. The only place we can go at the moment is a park near the tower block, but it's not very nice.

- If you were to move, what sort of building would you like to move to?
I wouldn't want to live anywhere too grand. Perhaps a small townhouse in the suburbs, with a garden where I can relax or grow flowers or

vegetables. It would need to be energy efficient to cut down on heating bills, and it would have to be functional but also attractive. I love wood as a building material, so perhaps it could have some wooden features like wooden doors and window frames, and perhaps a wooden terrace in the garden. Something like that.

Describe a building that you know well.

You should say:

where the building is

what it is used for

what the building looks like on the outside

and explain what you like or dislike about this building.

PART 2

A building I'm very familiar with is one that I pass every day on my way here. It's on the corner of Hemingway Rise and Coral Street, just outside the city centre. It's a college building, part of the university, and it houses the university's history department. However, it also has a large hall and a garden, which are used for public events like conferences and shows. Each summer, for example, the garden is used for outdoor productions of Shakespeare plays. Most of the university buildings in the city are very old and made of traditional yellow stone, but this one is more modern and is made of red brick with lots of large windows. I've never been inside, but I imagine it gets lots of light, which must make it a pleasant place to study. I like it because it's quite grand and has a pleasing geometric façade, giving it a sense of balance. However, I know that some people really hate it because it's out of keeping with the other college buildings. And because of its red brick façade, it's known locally as 'Tomato Ketchup House', which is a bit unfair, I think.

PART 3

- Are there any architectural styles which are particularly common in your home town or city?

I live in a very large city which has developed over hundreds of years, so I don't think there's just one particular style of architecture which is common. And I also think that it depends on which area of the city you're in. The financial district is very modern, with lots of steel and glass skyscrapers housing big organisations. Then there's the entertainment and shopping district, which is a mix of older buildings, mostly from the late nineteenth century, and this is where you'll find the cinemas, theatres and big department stores for which my city is particularly famous. On the outskirts, however, in the residential districts, there is more uniformity. The buildings there are mostly 1950s brick-built semi-detached houses, with large bay windows and small front and back gardens. So I suppose you could say that this is the most common architectural style, even though most houses aren't built like this anymore.

- What changes in architectural style have taken place in your country in the last 20 or 30 years?

The old industrial cities in my country suffered during the economic crises of the 1970s and 1980s and many of the manufacturing industries were forced to close down. After a period of stagnation, the government decided to attract service industries to these cities, so they demolished the ugly factories and warehouses, and built business and science parks in their place. The buildings on these parks are low-rise and high-tech, with lots of steel, glass and brushed concrete. And they all look very green and environmentally friendly. For example, they are surrounded by gardens and lakes and have roof gardens. And this has caught on in other towns and cities. This has been the most noticeable change in the last couple of decades.

- Why do you think that some people prefer modern buildings to more traditional ones?

I think that in some cases it's a matter of personal taste, in the same way that some people prefer modern art to more traditional art. However, there are also practical considerations, especially if you're living or working in those buildings. Modern houses and offices, for example, are designed not only to look attractive but also to be more comfortable, more user friendly and more environmentally friendly than old buildings used to be. They're light, they're well-insulated and they make better use of the space available. Personally speaking, I'd rather live in a modern house with all its benefits than in an old building with all its inconveniences.

WRITING

There is an area in my home city known as Little Marlow. It used to have a lot of beautiful old buildings, some dating back to the 1600s, and as a result it became one of the city's biggest tourist attractions. Then, in the late 1990s, the city council decided that the old buildings were becoming unstable and dangerous. They demolished them all and replaced them with modern houses, office blocks and a large shopping centre.

These new buildings were safer, more practical and more comfortable for the people who lived and worked in them. However, they lacked character and could have been in any city in any part of the world. The city had lost one of its most interesting areas, and fewer tourists came as a result.

This example illustrates why it is important to preserve old buildings.

However, there is another side to this argument. At the time, a lot of people objected to the demolition of these old buildings. They argued that while they needed to be renovated, they should otherwise have been preserved as they were. Unfortunately, these buildings had been in such bad condition that some were in danger of collapsing. It would have been more expensive to renovate them than to knock them down and build something new in their place.

So is it better to preserve old buildings or to replace them with something new? I believe that if a building is of historical or cultural importance, we should do both. We can look to Poland's capital Warsaw to see how this has been achieved. The beautiful medieval buildings in the city centre were largely

destroyed during the Second World War. Architects then referred to old photographs to rebuild them exactly as they were. Today, many visitors to Warsaw admire these 'medieval' buildings, not realising that they were only built in the 1950s. Compromise, therefore, is the best solution.

Practice tasks 2: Sample answers

SPEAKING

PART 1

- Do you enjoy attending cultural events in your home country?

I live in a village which, despite its relatively small size, has quite a lively cultural scene. There's a local dramatic society which puts on plays two or three times a year, and I enjoy going to those. There's also an art society, a photographic club and a few other cultural groups who hold exhibitions and shows once or twice a year. However, for anything else I have to go to the nearest city, which is two hours away by bus. I go there when I can, if there's something I really want to see, but getting into the city takes time and of course costs money. So yes, I do enjoy cultural events, but I don't do so as often as I'd like.

- Have you attended any interesting cultural events recently?

Last year our local dramatic society put on a performance of Goethe's 'Faust'. It was interesting and unusual because instead of performing the play in a theatre, they did it outside in the village. Each act took part outside a different building in the village, like the town hall, the church and so on. So instead of sitting down and watching the play, the audience followed the actors around the village and then stood there to watch the action. Also, instead of being set in the sixteenth century or whenever, the play was set in the 1920s, so the actors were dressed in 1920s clothes and there was a jazz band which played before and after each scene. I thought that was really clever and original.

- Are there any museums or art galleries you've been to that you would recommend to others?

I think one museum I love and would really recommend is the Musée d'Orsay in Paris. I was in the city on a weekend break a couple of years ago and hadn't actually planned on going there, but the weather wasn't very good, so it seemed like a good idea. Anyway, the Musée d'Orsay has

the biggest collection of impressionist and Post-impressionist art in the world. Artists like Monet, Manet, Renoir, Van Gogh and Degas are all represented there. However, one of the best things about this museum is the building itself. It's a converted railway station, still with many of the original features like the glass ceiling, the station clock and so on. Visually it's really quite stunning.

- Would you consider yourself to be artistic in any way?
That's a good question. I suppose it depends on what you mean by artistic. I'm not very good at painting, but I can draw a little, and I especially like drawing pictures of my friends, usually exaggerating their features like their hair, nose and mouth. And I'm really keen on photography. Not holiday pictures or things like that, but more abstract things that I see when I'm out. Shapes, shadows and details on buildings, that kind of thing. Does that count as being artistic? I also have a guitar which I've sort of taught myself to play. But not very well, I'm afraid to say. Actually, that's one regret of mine, not learning how to play a musical instrument. I have a friend who plays the piano and I'm really jealous of her!

PART 2

Describe a book, film or play that you particularly enjoyed.

You should say:

what it was called and who wrote or directed it

what it was about

who the main characters were

and explain why you particularly enjoyed it.

I don't really enjoy big Hollywood films, you know, with lots of special effects and famous actors. I prefer watching films made by small, independent film companies, which are more interesting, more unusual, perhaps a bit more adventurous. Anyway, I recently saw a wonderful comedy set in New Zealand called 'What We Do in the Shadows'. I can't remember the name of the person who directed it, but he's quite well known in New

Zealand, I think. And there weren't any famous big-name actors in it. Anyway, it's a sort of documentary, a fake documentary, about a group of vampires who share a house in Wellington. Like a real documentary there isn't really a story. We just see these vampires sitting around the kitchen table and chatting, or arguing about whose turn it is to do the washing up and cleaning, just like ordinary flatmates do. The camera also follows them as they go out at night to look for victims or meet up with their vampire friends. The main vampire in the house is called Viago. He's a really funny character, very uptight and obsessed about keeping the house clean. The other vampires are called Vlad, Deacon and Petyr, and they all have their own characteristics. Deacon, for example, likes knitting and dancing. I particularly enjoyed this film because it was funny, clever and original. In fact, it was very different from anything I've ever seen before.

Practice tasks 2: Sample answers

PART 3

- Do you think that learning about the arts (for example, painting and music) at school is as important as learning other subjects like maths and science?

If a school's responsibility is to prepare its students for the real world then, yes, I do think they should teach about the arts. Things like maths and science are important because they're practical, they're skills that we might need when we start work. However, learning about the arts means that we can function more effectively with more people in more social situations. If all you can talk about is football or last night's television, then that's going to limit your ability to interact socially. If you can talk about the arts, recognise paintings or sculptures or classical music and so on, then that will widen your social skills. I think that means that you're more likely to succeed in life.

- How important do you think it is for museums and art galleries to be free to enter?

I think that if museums and galleries want to encourage people to learn about and enjoy art and culture, then they should be free to enter. Most people I know would pay to see a film, a concert or a sporting event, but they probably wouldn't pay to go into a museum or an art gallery, so they wouldn't do it. However, there's a problem. If museums don't charge an entrance fee, how can they operate? I imagine they cost a lot to run, and of course the paintings and objects cost a lot to buy. Some museums compromise. They make entry free, but they ask visitors for a voluntary financial contribution. I'm not sure how successful this is, because I guess that not everybody would donate.

- Do you think that seeing a painting, sculpture or other work of art in a museum or a gallery is more rewarding than seeing it in a book or on the internet?

I'm not so sure about books, but the internet is a great way of looking at, for example, a famous painting. You can zoom in on the painting to look at details, which you can't do in a gallery, and the pictures are often accompanied by a detailed explanation of what you're looking at, or provide links so that you can see other works by the same artist. On the other hand, there's a certain feeling you get when you see a famous painting for real in a museum. I can't explain it, but it's really quite exciting. You're looking at the actual work of art, not its virtual version, and there's a connection, a feeling that you've somehow got closer to the artist. It's much more rewarding.

WRITING

The subject of whether governments should subsidise the arts at the expense of services like education, healthcare and public transport is controversial. Some say they should and some say they shouldn't, and both groups have valid arguments.

Those who oppose the subsidising of the arts in favour of essential services focus on the key word, 'essential'. Healthcare saves lives, education teaches us important skills which we will need throughout our lives and public transport helps us get around while reducing our reliance on cars, thus helping the environment. In my country, the government is often criticised for not putting enough money into these essential services. For example, our national health system is stretched to its limit. There aren't enough doctors, other healthcare workers are underpaid and the hospitals themselves are under-equipped. Surely, people argue, saving a human life is more important than paying an opera company to do a world tour.

Those who support subsidising the arts also have a compelling argument. Our film-making industry, our theatres, our museums and galleries and so on are part of what we are, they are part of our culture and our heritage. Furthermore, they help to bring in money. People will pay to go into an art gallery or see a show, that money provides employment, and the employees then pay tax which goes back into the economy and ultimately makes its way into the healthcare or education system. This cycle helps to keep the country running.

Speaking personally, I probably agree more with the first group than the second. After all, when I'm ill, I don't go to an art gallery for a bit of culture. I

head to my doctor and hope she can make me well. On the other hand, I hate to think how empty my life would be without art and culture. In conclusion, I believe that these should be subsidised, but perhaps the money could come from another source, such as a national lottery.

Practice tasks 3

Education

In addition to the words and phrases which appear in the General Vocabulary section of this book, you may also find some useful words and phrases on pages 71 and 72.

You will find some sample answers on the following two pages, but try to do the tasks first.

SPEAKING

PART 1

Answer these questions. Try to speak for about 4 or 5 minutes in total.

- What was your favourite subject at school and why did you enjoy it?
- Were there any subjects that you particularly disliked at school?
- Did you have a teacher who you found particularly inspiring or influential?
- Which of the subjects that you learnt at school will benefit you most in the future?

Part 2

Look at this task and spend one minute thinking about what you are going to say (you can make notes if you like). Then talk about the topic for between one and two minutes.

Describe a particularly memorable day you had at school or college.

You should say:

- what happened on that day
- who else was with you when it happened
- how you felt at the end of the day

and explain why you think this day was particularly memorable

Part 3

Answer these questions. Try to speak for about 4 or 5 minutes in total.

- Have schooling methods in your country changed since your parents were at school?
- Do you think that continuous assessment is a less stressful way of grading a student's progress than exams?
- How useful do you think computers are as a teaching resource?

WRITING

A lot of people think that the things you learn outside school are much more useful than anything you learn in school. Others believe that school teaches you most of the essential skills which will be useful later in life.

Discuss both these views and give your own opinion.

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

Write at least 250 words.

SPEAKING

PART 1

- What was your favourite subject at school and why did you enjoy it?

My favourite subject at school was always history. I've always been interested in learning about the past, and I'm fascinated by the way that things which happened hundreds of years ago can still be relevant today. I particularly liked learning about ancient Rome and how its influences can still be felt. For example, their political system, many of their laws, their language and even their alphabet still exist in one form or another in different parts of the world. And of course I liked learning about all those famous people whose names are still known today, like Caesar, Cicero and Nero.

- Were there any subjects that you particularly disliked at school?

There weren't really any subjects that I disliked at school, although there were some I wasn't especially keen on, like biology. I enjoyed learning about natural history, but I really didn't enjoy cutting up dead frogs and mice to see how they worked. And there were subjects that, although I liked them, I wasn't good at. I loved art lessons, but no matter how hard I tried, I couldn't paint. And I also loved music classes, even though I couldn't sing in tune or play a musical instrument.

- Did you have a teacher who you found particularly inspiring or influential?

Well, I said that my favourite subject at school was history because I've always liked learning about the past. However, what made it particularly enjoyable for me at school was my teacher. He had a real passion for his subject, and his enthusiasm had a positive influence on my desire to learn. He also had the ability to bring history to life. He didn't just stand there and talk to you like some teachers. He got his students actively involved in the subject. For example, he once divided the class into two

groups. One group wanted the emperor to rule Rome and one group wanted the senate to rule. Each group had to argue its case to him, and he had to decide who had the best argument.

- Which of the subjects that you learnt at school will benefit you most in the future?

That's difficult, because most of them will benefit me in one way or another. If I had to make a choice, however, it would have to be languages. I learnt English, of course, and this will definitely benefit me because English is the language of international business and politics, and is probably the most widely spoken language in the world. I also learnt Spanish, another widely spoken language. Since Spanish has the same Latin roots as languages like French and Italian, it will help me communicate in lots of countries.

Part 2

Describe a particularly memorable day you had at school or college.

You should say:

what happened on that day
who else was with you when it happened
how you felt at the end of the day

and explain why you think this day was particularly memorable

It's often said that the schooldays you remember the most are your first day and your last day at school. For me they were both memorable, but it was my last day at secondary school that brings back particularly vivid memories. It was also the last day of my final school-leaving exams, which was geography. It had never been my best subject, and because I really wanted to get a good grade, I'd been up really late the night before revising. I think I finally got to bed at about 2 o'clock in the morning. Anyway, I remember waking up feeling worried about the exam but also excited because once the exam was over, I'd be leaving school and beginning a whole new chapter in my life. I'd arranged to meet my classmates Paola and Mercedes for a coffee

before the exam, so we met up in a café near the school and then walked into the exam hall together. I don't remember much about the exam itself, except that I found it less difficult than I had expected, but I do recall the moment we were told to stop writing and hand in our answer sheets. It occurred to me that this would be the last time I would be told what to do as a child. From that moment, and from the moment I walked out of school later that day with my classmates, I was entering adulthood for the first time. I was both excited and apprehensive about the future, but most of all I felt free. That's what makes it particularly memorable for me, I think.

Practice tasks 3: Sample answers

Part 3

- Have schooling methods in your country changed since your parents were at school?

I think that there have probably been a few changes in the thirty years or so since my parents were at school. For a start, there was much more discipline at school then, and you had to follow lots of strict rules. If you broke those rules, you were punished. The teachers were even allowed to hit you, which would probably be illegal now. Teaching methods were probably very different too. In those days, you sat in silence while the teachers taught you, and you would only speak when you were asked a question. Nowadays, things are definitely more relaxed. Pupils are encouraged to get more involved in the learning process, and are actively encouraged to question and challenge things in the classroom. This is probably a much more effective way of learning.

- Do you think that continuous assessment is a less stressful way of grading a student's progress than exams?

I've always hated exams, and found them really stressful. In fact, I've never really seen the point of them. I hate the fact that everything you've learnt over the year is tested under pressure in three or four hours. And in addition to being stressful, they don't really say much about your knowledge of the subject or your ability as a student. With continuous assessment, your school work is graded over a period of time. Because you're not under so much pressure, you can plan your essay or assignment or whatever more thoroughly, and present a better piece of work at the end. I would say that continuous assessment is far less stressful and a much better indicator of your ability in any given subject.

- How useful do you think computers are as a teaching resource?

Computers have certainly changed the way we learn over the last thirty

years or so. They're invaluable as a source of reference, when we're writing an essay for example, and they can be used as an exam resource to test what we've learnt. And they're very useful if you want to study on a course but are unable to get to a school or college. After all, computer-based distance learning means that millions of people around the world now have an opportunity to study on a real course. However, in my opinion, as an actual teaching resource, they're no substitute for being in a real classroom with a real teacher. You don't have that same level of interaction with the teacher, for a start, which I think is essential for effective learning. And you don't have other students who you can interact and work with.

WRITING

When we go to school, we study a lot of subjects. Some of these, such as reading, writing and arithmetic, are essential skills which we will use throughout our lives. Others may be useful in certain careers or other circumstances, but in most cases are rarely if ever needed in our day-to-day lives. In my experience, I have never been in a situation where the history, geography, chemistry and physics I learnt at school have benefited me in any way.

Outside of school I have acquired far more important and useful knowledge and skills. For example, I have learnt how to drive a car, I have studied three languages, I have taught myself the importance of careful financial budgeting and I have travelled and learnt to appreciate and accept other people and cultures. Furthermore, I have become mechanically and technologically proficient: school never taught me how to fix a car engine, change a plug or set up a website. On the surface, therefore, it would appear that almost everything useful I have learnt has been outside school.

However, is this entirely true? When we are at school, we tend to look at each day as little more than a series of classes broken up by breaks, meals, sports and other activities. What we are not really aware of at the time is what I would call 'between the lines learning'. In class, for example, we are learning how to record, process and filter information. We are also learning how to work with others. When we play sports, we are learning about the importance of teamwork and strategy. At other times we are learning how to behave and

how to follow rules (or, if it suits us, how to bend or break the rules without getting caught out).

In conclusion, therefore, I think that while most of the practical skills we need throughout our life are learnt outside school, most of the formative skills we need to succeed in life are acquired at school. In other words, schools teach us much more than just a series of unrelated subjects. It is just that we don't realise this at the time.

Practice tasks 4

The environment

In addition to the words and phrases which appear in the General Vocabulary section of this book, you may also find some useful words and phrases on pages 73 and 74.

You will find some sample answers on the following two pages, but try to do the tasks first.

SPEAKING

PART 1

Answer these questions. Try to speak for about 4 or 5 minutes in total.

- Are you interested in environmental issues?
- Have you ever taken part in an environmental event?
- Do you do anything to reduce your impact on the environment?
- If you could do one thing to help your environment, what would you do?

PART 2

Look at this task and spend one minute thinking about what you are going to say (you can make notes if you like). Then talk about the topic for between one and two minutes.

Describe something that is having a major and negative impact on the environment in your home town or country.

You should say:

what the problem is and what is causing it

where it is happening

what effect it is having on people and / or wildlife

and explain what you think could (or should) be done about it.

Part 3

Answer these questions. Try to speak for about 4 or 5 minutes in total.

- Do you think that governments around the world are doing enough to prevent environmental problems?
- What steps could big businesses and organisations take in order to be more environmentally friendly?
- Do you think that classes on environmental issues should be compulsory in schools?

WRITING

You should spend about 40 minutes on this task.

Write about the following topic:

Governments alone should not be responsible for reducing global environmental damage. Everyone, from individuals to major industries, should play their part.

To what extent do you agree or disagree with this statement?

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

Write at least 250 words.

Practice tasks 4: Sample answers

PART 1

- Are you interested in environmental issues?

Most environmental issues interest me to a greater or lesser degree, but I'm particularly interested in wildlife conservation. The damage we're doing to our environment is having a major negative impact on wildlife around the world, and a lot of endangered species are facing extinction as a result. I'm particularly interested in the 'keystone' species. That is, those species on which our ecosystems rely. Take the bee, for example. In addition to providing us with honey and wax, bees are important plant pollinators. In fact, one third of the food we eat wouldn't be available if we didn't have bees. However, modern farming practices are contributing to their decline in numbers. I think we really need to end this threat to them.

- Have you ever taken part in an environmental event?

Last year my college held an international environment awareness day, and I was on the committee that organised it. My job was to arrange for some specialists to come to the college and give a talk. One person I approached – actually a friend of mine who had worked on a turtle sanctuary in Sri Lanka – came and gave a really interesting talk on what local people were doing to save these marine animals. Another person, who worked at a local wildlife park, gave a brilliant presentation on the sea otter, an important keystone species. The event was a big success except for one thing. The students who organised the food and drink for the event used environmentally unfriendly non-recyclable polystyrene cups and plates. How ironic!

- Do you do anything to reduce your impact on the environment?

I suppose that like many other people I recycle whenever possible. There are recycling banks across my home town where you can take things like glass, tin foil, paper, plastics and other materials. The problem is that

many people are unable or unwilling to do this, so they just put everything in the bin. Some countries like the United Kingdom actually have home collections where you can put out your recyclable materials with your other rubbish and it gets taken away. I think that's a really good idea, and I would love to see it in my country.

- If you could do one thing to help your environment, what would you do?
Well, actually, there are a couple of things I would do. The first would be to start a home collection for recyclable materials similar to the one I've just described. People would have a special box or bin where they could put their recyclable materials, and these would be collected on their usual bin day. Another thing I would do would be to introduce a plastic bag charge in shops and supermarkets. Shops usually just give these free to their customers, so people take them and then throw them away. These end up in rivers and the sea, causing terrible harm to wildlife. I think there are already bag charges like this in places like the United Kingdom, and I would like to see something similar in my country.

PART 2

Describe something that is having a major and negative impact on the environment in your home town or country.

You should say:

what the problem is and what is causing it

where it is happening

what effect it is having on people and / or wildlife

and explain what you think could (or should) be done about it.

My country has gone from being a mostly agricultural country to being a mostly industrial country in less than forty years, and many people have become wealthier as a result. There is less unemployment, less poverty and less homelessness, and most people now have a better quality of life. This is a positive thing in my opinion. However, there has been a price to pay, because of course more industry means more pollution. Furthermore,

increased wealth has resulted in greater ownership of private vehicles. In fact, car ownership has risen by about 10 per cent every year since the early 1990s, and last year my country gained an additional 17 million new cars. As a result, air pollution in the bigger cities can get really bad. In my city in winter, we get thick smog which can last for days. This has a terrible effect on people's health, especially if they have existing chest conditions. In fact, in my country as a whole, air pollution kills about thirty thousand people every year. I think that people need to be encouraged, or perhaps compelled, to use their own vehicles less and use public transport instead. Improving the public transport infrastructure and subsidising public transport would certainly help, but I think that's only part of the solution. People, after all, like using their own car, having their own space, not having to rely on bus and train times and so on. Perhaps a more effective solution would be to charge people each time they use their car. So, for example, you pay for each kilometre you drive. I think that would really help. People would certainly think twice before making a car journey if they knew it would cost them money.

Practice tasks 4: Sample answers

PART 3

- Do you think that governments around the world are doing enough to prevent environmental problems?

I think that depends on where you are. Some governments are doing a lot, others are doing very little or nothing at all. In my country, the government allowed industry to develop unregulated, and now we are all paying the price because of the appalling levels of pollution. However, all my government does is talk about what it should do, but doesn't actually do anything. Other governments have taken far more positive action. One example that springs to mind is Singapore, where clean air laws and regulations, together with an excellent public transport system and protected green spaces, keep this small but crowded island comparatively clean and green. In fact, in some parts of the island, you would find it hard to believe you were in a city of over 5 million people.

- What steps could big businesses and organisations take in order to be more environmentally friendly?

There are several things that businesses could do, and they don't have to be expensive. For example, they could use products that reduce their reliance on natural resources. So instead of using oil or gas for heating, they could use solar power. And instead of using tap water, they could have rainwater tanks and use that water instead. They could also make better use of recycled products. That would include everything from office paper to office furniture. Additionally, if their employees have to travel a lot for conferences, they could perhaps consider ways in which this could be avoided. For example, instead of travelling to another country to meet their clients, they could hold a conference call instead. Little things like that would really help, I think.

- Do you think that classes on environmental issues should be compulsory in schools?

I completely agree with this. I think it's really important that children learn from an early age how important the environment is, how fragile it is, what sort of impact they have on it and how they could reduce that impact. I remember that when I was at school we had environment days where a whole day each term was devoted to learning about environmental issues. We had visiting speakers who gave talks and presentations, and we watched videos, did quizzes and played games, and we held class and group discussions and debates. Those days were great fun and really interesting, but most importantly they made us aware how important it was to be environmentally responsible.

WRITING

Our planet's environmental system is under threat like it has never been before. Pollution is killing life in our rivers, seas and oceans, deforestation is destroying the natural habitat of many species of land animals and the overuse of pesticides is killing insects, which are vital for the well-being of our ecosystem. Our planet's temperature is rising too as a result of pollution. This has resulted in declining Arctic sea ice, a 17 cm sea level rise in the last 100 years, and more extreme weather events around the world.

These devastating changes should be prompting everyone – individuals and industrial organisations alike – to take immediate action to reduce their impact on the environment. Instead, however, apathy and indifference seem to prevail. The general attitude is to keep doing things the same until told to do otherwise. After all, people say, if things were really that bad, the government would do something about it.

Many governments are doing something, of course. In fact, thanks to legislation in my country, large areas of natural land are now protected from development, heavy fines are imposed on industries which cause excessive pollution, and homeowners are given subsidies to install environmentally friendly solar panels to heat and light their homes.

However, it is also the duty of individuals and organisations to take responsibility. Individuals can recycle their household waste, they can turn down their heating, they can turn off lights when not using them and they can walk, cycle or take the bus instead of driving everywhere in their cars. Companies and organisations can look at the way they operate to reduce their

impact on the environment. For example, they can switch to a green energy supplier, they can use recycled products, they can use video-conferencing to cut down on travel, their employees can share cars on the journey to work and so on.

In conclusion, therefore, I believe that we should all play our part and consider ways of reducing our impact on the environment. We should not rely on our governments alone to do this.

Practice tasks 5

Food and diet

In addition to the words and phrases which appear in the General Vocabulary section of this book, you may also find some useful words and phrases on pages 75 and 76.

You will find some sample answers on the following two pages, but try to do the tasks first.

SPEAKING

PART 1

- What are your favourite foods?
- How have your tastes in food changed over the years?
- Are there any foods that you dislike or cannot eat?
- Do you think that you have a healthy diet?

PART 2

Practice tasks 5: Sample answers

SPEAKING

PART 1

- What are your favourite foods?

I don't really have any favourite foods, although I am fond of spicy dishes. Anything with a bit of heat in, really. So I like Mexican, Indian and South-East Asian dishes more than, say, European or North American dishes. However, what I like eating also often depends on things like my mood, the weather, where I am and who I'm with. So on a cold day, I prefer things like soup and casseroles, and on hot days I'd rather have something like a salad. If I'm away from home and feeling homesick, I'll go for comfort foods. The sort of thing my mother would cook. And if I go out with friends in the evening, I enjoy meals where everyone shares and gets to try a little bit of everything, like in a Spanish tapas bar.

- How have your tastes in food changed over the years?

I think that most people's tastes in food change as they get older, don't they? When I was younger, I preferred sweet things like chocolate and ice cream. Then as I got older I developed a preference for more savoury foods. I went through a sort of process in my mid- and late-teens of trying as many different things as possible, and if I didn't like them at first, I would try them again and try to develop a taste for them. The first time I tried olives, for example, I thought they were disgusting, but now they're one of my favourite things. Also, as I said, I really like spicy foods, but that wasn't always the case. When I was young, savoury foods had to be quite bland, otherwise I just wouldn't touch them.

- Are there any foods that you dislike or cannot eat?

There are some vegetables I really dislike, although I've tried many times to get to like them. No matter how hard I've tried, I still find broccoli and courgettes utterly disgusting. Courgettes especially. And there are some

things I wouldn't eat because I don't like the idea of them. Things like snails, for example. The very thought of eating a snail makes me feel ill. There aren't any foods I can't eat because of allergies or intolerances, although I've got a friend who can't eat seafood and another who can't eat wheat. You hear a lot about food allergies and intolerances these days, don't you? But I wonder if some people say they have these because it's almost fashionable to say you have a particular food allergy or intolerance.

- Do you think that you have a healthy diet?

I like to think that I eat healthily. I certainly have a reasonably well-balanced diet, and I try to eat lots of things like fresh fruit and vegetables. It's not always easy, of course. I'm very busy most of the time, and when I get home in the evening the last thing I want to do is prepare and cook vegetables and meat. It's often much easier to put a frozen pizza in the oven or a ready-made meal in the microwave. And of course it's even easier to pick up a burger or pizza from a fast-food restaurant and take that home to eat. So I guess there are times when perhaps I don't eat as healthily as I should. On the whole, however, I reckon that my diet is quite good.

PART 2

Describe a dish that is popular in your country.

You should say:

- what the dish is called
- what it contains and how it's made
- where and when you usually eat this dish

and explain why it is so popular

My country is famous for its food, and especially for what people now call 'fusion' cooking, although in my country we call it nonya cooking. This is where you take foods from two or more countries, combine them and then add local ingredients to give it a local flavour. One of these dishes, and one

that is especially popular in my country, is called nasi lemak. In fact, you could say it's one of our national dishes. Basically it's rice and coconut to which a spicy fish sauce is added. To make it, you steam rice with coconut milk. At the same time, you make the sauce, which is called sambal, by frying shrimps with onions, garlic, chillies and other spices. You then put the rice on a plate, cover it with the sauce and then add eggs, small crispy fried fish called ikan bilis, cucumber slices, peanuts and other things. In my country, it's a popular breakfast dish, and most people eat it at open-air-cooked food markets on their way to work, or they get a takeaway and bring it to the office. I think it's popular because it's not only delicious and nutritious, but it's also very cheap. It's also quite easy to make. You can make a large pot of the rice and another of the sambal and keep it in the fridge. Then if you get hungry during the day, you simply put a portion of each on a plate and heat it up in the microwave. And of course, like national dishes around the world, everyone's mother or grandmother makes the best nasi lemak!

Practice tasks 5: Sample answers

PART 3

- How would you encourage people to have a more healthy diet?

I would probably do two things here. The first would be to point out the importance of eating healthily. To be more precise, I would point out the dangers of having an unhealthy diet and the benefits of eating more healthily. A poor diet can lead to things like malnutrition, obesity and related health issues like diabetes, while a healthy diet makes you look and feel good. After all, as they say, you are what you eat. I would then show people how easy it can be to have a well-balanced diet, and also how tasty healthy food can be. For example, a lot of people complain that it takes time to prepare fresh vegetables, but you can buy these in the frozen food section of a supermarket, washed, cut and ready to cook. And for people who say that healthy food is boring, I would show them some delicious recipes that would make them change their opinion.

- Do you think that schools should teach young people how to cook?

In my opinion, cooking is an essential life skill, but it amazes me how few people can actually do it. Some of my friends have never even cooked an egg or prepared a simple meal from fresh ingredients, and most of them seem to live on fast food or something they can heat up in the microwave. They often look ill or tired, and this could be a result of their diet. So yes, I think schools have a duty to teach their students how to cook. I believe that this is an important first step on the road to a healthy lifestyle. And they should also show their students that cooking can be interesting and fun, and not a chore like housework.

- What effects have fast-food restaurants had on people's health?

Fast food has become extremely popular in my country in the last few years, and because so many fast-food places have opened, it's now becoming more difficult to find traditional foods. And this has definitely

had an impact on people's health. Twenty years ago or so, people were not only eating healthier food, but they were also leading a more active lifestyle. However, the combination of fast food and a more sedentary lifestyle means that more people are overweight or even obese, and our health service is having to deal with a lot of related illnesses and diseases. It's become so serious that our government is even talking about putting special taxes on fast food like burgers and fried chicken so that people eat less of it, but I think this probably wouldn't be enough.

WRITING

My parents' kitchen was fairly simple. There were only a few appliances which included an oven, a microwave, a toaster and an electric kettle, but we ate most of our meals at home. A meal out was an occasional treat for birthdays, anniversaries and so on. In my kitchen, I still have the same appliances that my parents had, but I also have a food processor, a fruit juicer, a coffee machine, a sandwich toaster and a huge variety of implements designed to make cooking easier. Yet despite this, I now eat most of my meals in restaurants and cafés.

I know am not alone. On most nights, restaurants in my city are packed. New restaurants open every week, and the variety of food on offer is astonishing. On just one street in my city, for example, you can eat Italian, French, Spanish, Lebanese, Chinese, Japanese, Mexican, Indian, North African and Thai food, not to mention a huge variety of fast-food options like burgers, sandwiches and pizzas. Eating out in my country is now considered the number two pastime after watching television.

I believe there are three main reasons why this is the case. The first is that people have more disposable income, so they can afford to eat out more. And as restaurants have to compete with one another for customers, they keep their prices comparatively low, so eating out has become relatively cheap. The second is the time factor. Preparing a meal is time-consuming, and people either don't have enough time or want to use it in other ways. The third is that television cookery programmes have become very popular in my country, and while they are supposed to encourage people to cook more, the effect is often the opposite. People see the wonderful dishes that our celebrity chefs prepare, and instead of cooking these dishes themselves, they go out to a restaurant

where someone else does all the hard work.

The result is that many modern kitchen appliances are rarely used. They have become something you decorate your kitchen with, or use as a status symbol. The kitchen is no longer a place where you work hard to prepare a meal. It has become a place to relax while you admire your shiny appliances and think about your next meal out.

Pages 3 – 4 Changes 1

⇒ *The words and phrases in this module are particularly useful for Part 1 of the IELTS Writing Test, where you may be asked to write about changes shown in tables or graphs.*

1

1. increased / rose / went up (in any order), 2. fell / dropped / went down / declined (in any order), 3. remained steady / remained constant (in either order), 4. fluctuated / peaked at / reached a peak of (in either order)

2

1. gradually / steadily (in either order), 2. slightly, 3. dramatically / sharply (in either order), 4. upward trend

3

The number of visitors to Seahaven (1) *increased / rose / went up* (2) *gradually / steadily* between April and June, then (3) *increased / rose / went up* (4) *dramatically / sharply* in July, and continued to (5) *go up / increase / rise* in August. For the first four months, visitor numbers to Bridgeport (6) *fluctuated*, but then (7) *dropped / fell / declined / decreased / went down* (8) *dramatically / sharply*

Answers

in the final month. Westhampton visitor numbers (9) *remained constant / remained steady* from April to June, then (10) *increased / rose / went up* (11) *slightly* in July and finally (12) *peaked at / reached a peak of* 11,000 in August.

Overall, there was an (13) *upward trend* in the number of visitors to Seahaven and Westhampton, but a (14) *downward trend* in the number of people visiting Bridgeport.

(Remember to vary your vocabulary in Writing tasks. Try not to use the same word too often. If, for example, you use *increase* in one part, use *rise* in another, and *go up* in another.)

1. providing that* you return, 2. provided that* I have, 3. unless you get (*unless* means the same as *if you don't*), 4. on condition that* they tidy (*on condition* *that* is quite formal), 5. as long as we continue, 6. no matter how much you, 7. however many books you, 8. wherever you

* We can omit *that* after *providing*, *provided* and *on condition*. We can also use *the* before *condition*.

Note: All of these sentences can also begin with the conditional word or phrase. For example: *You can borrow my dictionary providing that you return it before you go home* = *Providing that you return it before you go home, you can borrow my dictionary*. When we do this, we are shifting the emphasis of the sentence to the conditional clause.

Page 24 How something works

⇒ *The words and phrases in this module are particularly useful for the IELTS Listening Test (where you may hear someone describing how something works) or Part 1 of the IELTS Writing Test (where you may be shown a picture or diagram of something, and have to explain how it works).*

1. A thermostat

A thermostat contains a strip or coil of steel and a strip or coil of copper, one on top of the other. As the strip / coil **heats up**, the metals **expand**, but one does it faster than the other. The strip / coil **bends** and **connects** with a switch, which **turns off** the power supply. When the strip / coil **cools down**, the metals **contract** and the switch is **disconnected**. The thermostat is **adjusted** using a dial or other control.

2. A disc player

A disc player (for example, in a computer) has several component parts. A disc is **inserted** into the player and begins to **spin**. At the same time, a thin beam of light called a laser **strikes** the disc and **converts** digital signals into sounds or images, which can be **heard** through speakers or **viewed** on a screen. Volume or brightness can be **increased** or **decreased** by means of a button, knob or other control. Nowadays, discs are largely being **replaced** by storage devices like memory sticks, which have no moving parts.

3. An aerosol

In an aerosol, liquid and gas are **compressed** in a metal and / or hard plastic tube. This can be **released** from the tube by **pushing** a button, which **opens** a valve. When the liquid–gas combination **leaves** the tube and **mixes** with

oxygen, it rapidly **expands**.

4. An aircraft

Most aircraft are **made** of aluminium, and require two forces to allow them to fly: thrust and lift. As the aircraft **moves** forward on the ground under the power of its engines, air **flows** over the wings. As it **accelerates** / **moves** faster, **creating** / **producing** more thrust, a vacuum is **created** / **formed** over the wings. This **creates** / **produces** lift. The aircraft is **pulled** into the air by the force of this lift.

5. A digital camera

A digital camera **consists** of two main parts: a body and a lens. When a button is **pressed** on the body, a window in the lens called a *shutter* **opens** and light **enters** the camera. The amount of light going into the camera is **controlled** by both the speed of this shutter, and a smaller window called an *aperture*. Both the shutter speed and the size of the aperture can be **adjusted** by the person using the camera. The light **hits** a sensor in the body of the camera, which **records** the light as a digital image. The image is **recorded** / **stored** on a memory card in the camera, and this can later be **downloaded** onto a computer.

Other words and phrases you might find useful include: fold, reflect, reverse, revolve, start, stop, turn, turn down, turn up, unfold, unwind, upload, wind

Note: When we describe how an object works and there is no other person or agent involved in our description, we use the *active voice* ('...light *enters* the camera...', '...the metals *expand*...'). When there is a person involved in the process, we usually use the *passive voice* (*is* / *are* + a past participle: 'The thermostat *is adjusted*...', '...liquid and gas *are compressed*...'). We use the passive voice when we do not know who does the action or process, or because we do not need to say who does it.

1

Despite banning tobacco advertising and raising the price of cigarettes, the government's anti-smoking campaign has failed to have any long-term effects. It is now widely believed that more drastic measures are necessary. A new national committee, which has been formed to tackle the problem, has made several recommendations. These include banning smoking in all public areas, and denying hospital treatment to persistent smokers who have been warned by their doctors to give up but failed to do so.

2

It is arguable whether good pronunciation is more important than good grammar and vocabulary. Conscientious students balance their acquisition of these skills, hoping to achieve both fluency and accuracy. English teachers should encourage their students to practise all the relevant language skills, and use their English at every opportunity.

3

It is becoming increasingly difficult for many people to find decent accommodation in the city at a price they can afford. To put it simply, there are too many people and not enough homes for them. Local community centres and charitable organisations such as *Home Front* can offer advice, but it is widely agreed that the situation is no longer manageable. The fact that some councils in the city

Pages 56 – 57 Useful Interview expressions

1

Agreeing with somebody: I agree. / I couldn't agree more. / That's just what I think. / That's my view exactly. / That's right.

Disagreeing with somebody: I don't entirely agree. / I'm afraid I disagree / don't agree. / I see things rather differently myself. / Well, actually... / Well, as a matter of fact,...

Interrupting somebody: Could I just say that...? / Excuse me for interrupting... / Let me interrupt you there. / Sorry to butt in,... / Sorry to interrupt,... (*You shouldn't interrupt the examiner too often. In any case, the examiner will leave you to do most of the talking*)

Asking somebody for their opinion: Do you agree that...? / What are your feelings about...? / What are your views on...? / What do you think about...? / What's your opinion? (*You probably won't need to use these expressions yourself in the Speaking Test, but you are likely to hear the examiner use them*)

2

Asking for clarification or repetition: Could you repeat the question? / I'm afraid I didn't catch that. / I'm sorry? / What was that? / Would you mind repeating that?

Saying something in another way: In other words... / Perhaps I should make that clearer by saying... / To put it another way,... / What I'm trying to say is... / What I mean is...

Giving yourself time to think: Hmm, how can I put / say this? / Let me see. / Let me think about that for a moment. / May I think about that for a moment? / That's an interesting question.

Summing up what you have said: So, basically,... / In short / brief,... / So, in conclusion,... / To summarise,... / To sum up,...

Pages 89 – 90 Money & finance

1

1. **Profit** is the money you gain from selling something, which is more than the money you paid for it. **Loss** is money you have spent and not got back.
2. **Extravagant** describes someone who spends a lot of money. **Frugal** describes someone who is careful with money. **Economical** describes something that is not expensive to use or run.
3. A **current account** is a bank account from which you can take money at any time. A **deposit account** is a bank account which pays you interest if you leave money in it for some time (we can also say *savings account* or *notice account*).

4. A **loan** is money which you borrow to buy something. A **mortgage** is a special kind of loan used to buy property (a house, a flat, etc.) over a period of time.
5. To **deposit** money is to put money into a bank account. To **withdraw** money is to take money out of a bank account (*deposit* can be a noun or a verb. The noun of *withdraw* is *withdrawal*).

Answers

6. A **wage** and a **salary** are money you earn for doing a job, but a wage is usually paid daily or weekly, and a salary is usually paid monthly. We also use salary to describe the amount of money you earn over a year (*He earns an annual salary of £40,000*).
7. If you are **broke**, you have no money. This is an informal word. If you are **bankrupt**, you are not able to pay back money you have borrowed. This is a very serious financial situation for someone to be in.
8. In the UK, **shares** are one of the many equal parts into which a company's capital is divided. People who buy them are called *shareholders*. **Stocks** are shares which are issued by the government. **Dividends** are parts of a company's profits shared out among the shareholders.
9. **Income tax** is a tax on money earned as wages or a salary. **Excise duty** is a tax on certain goods produced in a country, such as cigarettes or alcohol.
10. To **credit** someone's bank account is to put money into the account. To **debit** someone's bank account is to take money out. In the UK, many people pay for telephone bills, etc., using a system called *direct debit*, where money is taken directly from their bank account by the company providing the goods or services.
11. Traditionally, a **bank** is a business organisation which keeps money for customers and pays it out on demand, or lends them money. A **building society** is more usually associated with saving money or lending people money to buy property. These days, there is very little difference between them.
12. A **discount** is the percentage by which a full price is reduced to a buyer by the seller. A **refund** is money paid back when, for example, returning something to a shop (it can also be a verb: *to refund*).
13. A **bargain** is something which is bought more cheaply than usual. Something which is **overpriced** is too expensive. Something which is **exorbitant** costs much more than its true value (*£12 for a cheese sandwich? That's exorbitant!*).

14. A **worthless** object is something which has no value. A **priceless** object is an extremely valuable object.
15. If you **save** money, you put it to one side so that you can use it later. If you **invest** money, you put it into property, shares, etc., so that it will increase in value.
16. **Inflation** is a state of economy where prices and wages increase. **Deflation** is a reduction in economic activity.
17. **Income** is the money you receive for doing something. **Expenditure** is the money you spend.
18. If you **lend** money, you let someone use your money for a certain period of time. If you **borrow** money from someone, you take money for a time, usually paying interest (*Can you lend me £20 until the end of the month?*).

Notes:

Most large towns and cities in the UK have 'Park and Ride' schemes. These are large car parks outside city centres where drivers can park their cars, often for free. They can then take a bus into the city centre.

Answers

Distances and speed limits in the UK are in *miles* (1 mile = about 1.6 kilometres) and *miles per hour (mph)*. The maximum speed limit is 60mph on single-lane roads outside towns, or 70mph on dual carriageways and motorways (although this may increase to 80mph on motorways in the near future). In most built-up areas, the maximum speed limit is usually 20 or 30mph. Drivers who are caught speeding can face penalties ranging from a fine to imprisonment, depending on how fast they were driving and where. They also receive 'penalty points' on their driving licence, and can have their licence suspended.

Drink-driving is considered a serious offence. Offenders automatically have their driving licence suspended for at least a year, will normally receive a fine and in extreme cases (especially where they cause an accident), may go to prison.
